## UNDERSTANDING BLIND SURVEYS

A non-blind survey (rolling or otherwise) has a fixed and known survey period where the sample is placed evenly across the survey weeks.

For blind surveys, the 'in' survey period is fixed and known to the market (12 week periods for Newcastle). The actual eight weeks of placement, from the published 12, are selected at random and the dates withheld from the market, i.e. they are not aware the weeks the sample is being placed, hence the term 'blind'.
